ALLOWANCE

Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 1-41, 46, 47, 51, and 56-58 directed to an invention non-elected without traverse. Accordingly, claims 17-27 and 40-51 been cancelled (see Examiner's Amendment below).

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Non-elected claims 1-41, 46, 47, 51, and 56-58 have been cancelled.

Reasons for Allowance

2. Claims 42-45, 48-50, and 52-55 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 42 and 44, wherein the claimed invention comprises, in claim 42, a plurality of particles having an electrostatic property contained in a gaseous phase provided between the pair of

Art Unit: 2873

substrates; and the particles each comprise a parent particle as a core, and plural child particles fixed to the parent particle in a manner to cover a substantially entire surface of the parent particle; in claim 44, a plurality of particles having an electrostatic property contained in a gaseous phase provided between the pair of substrates; and the particles each comprise a parent particle as a core, a first coating layer coating an entire surface of the parent particle and comprising a material having a higher softening point than that of the parent particle, a second coating layer coating an entire surface of the first coating layer and comprising the same material as that of the parent particle or a material having a lower softening point than that of the parent particle, and plural child particles fixed to the second coating layer in a manner to cover a substantially entire surface of the second coating layer, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
